

Steps to set up Java security for INB

For MAC users:

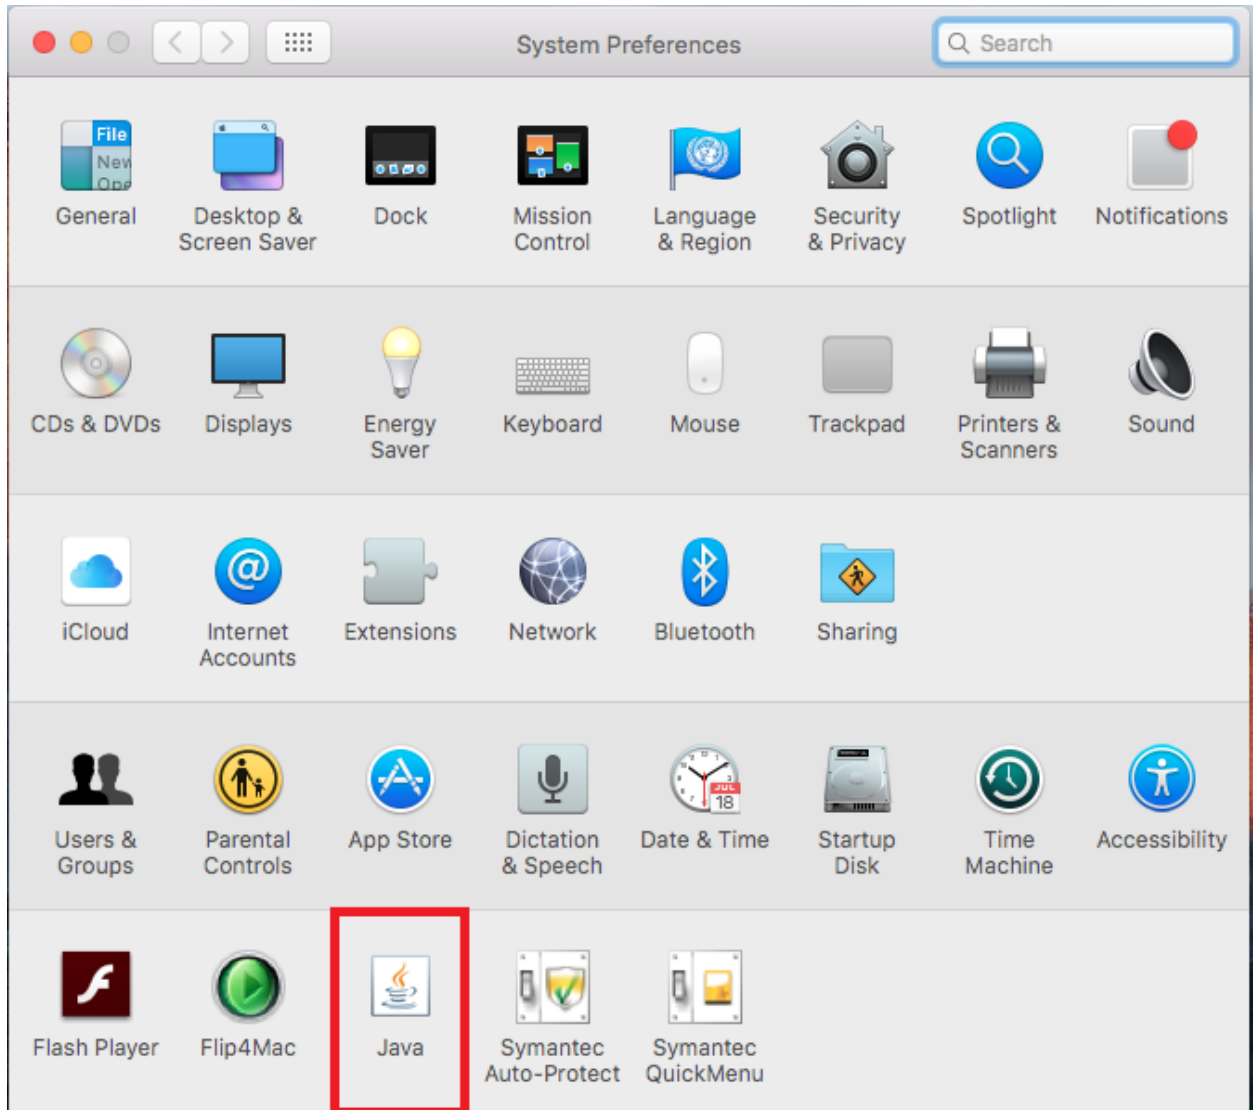

1. click Apple icon on the upper left corner

2. select System Preferences

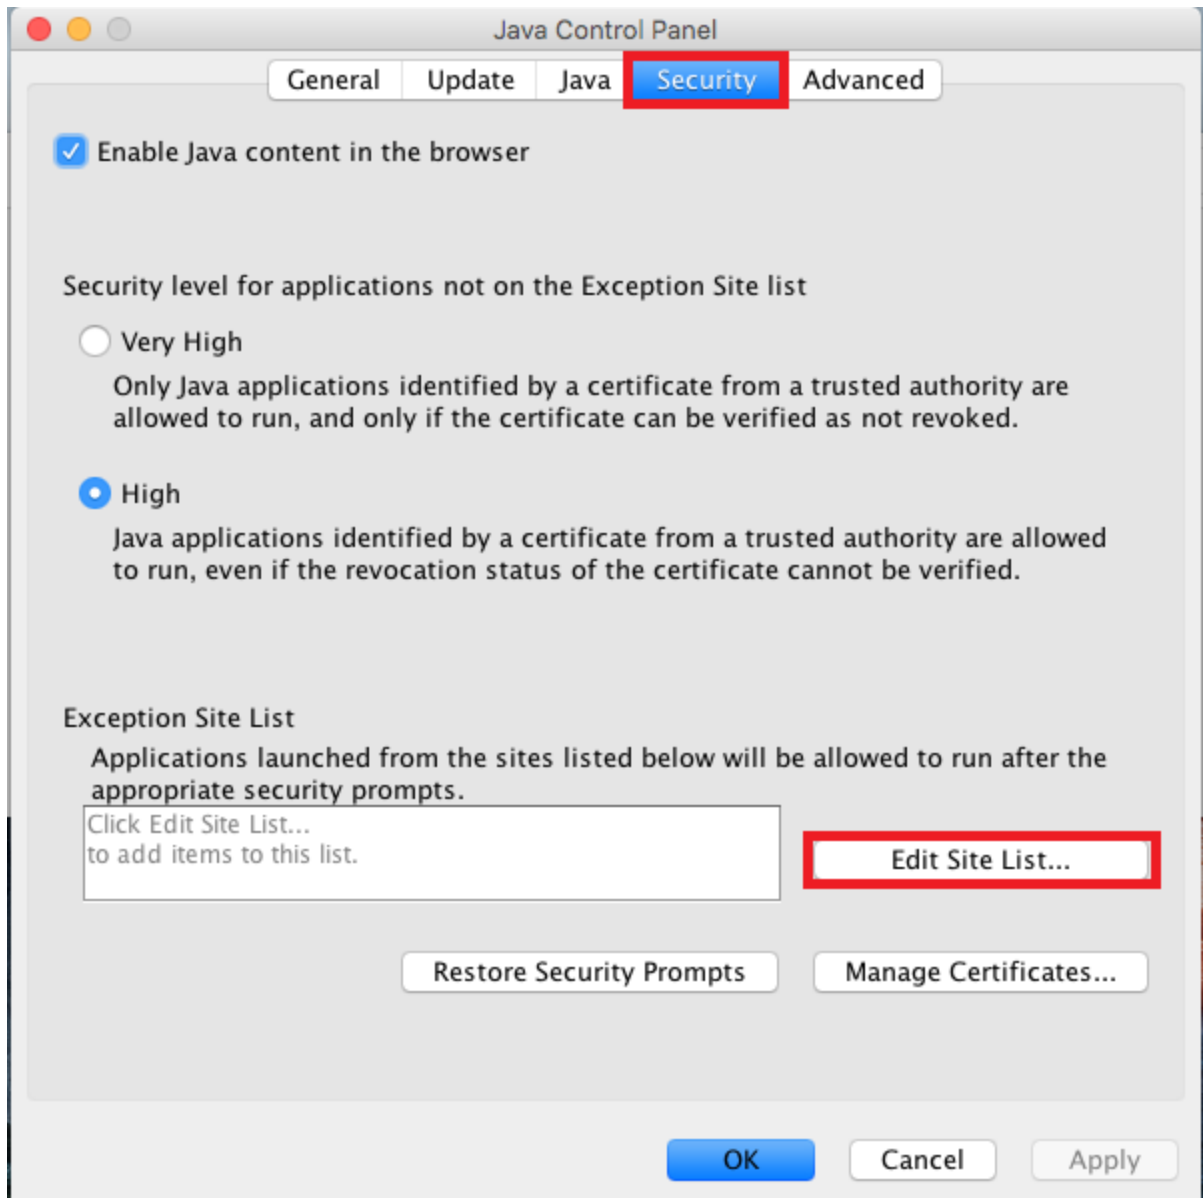

3. select Java icon from the last row (on my mac)

4. The Java window and shortly thereafter the Java Control Panel window will appear, click on the Security tab, and then on the Edit Site List button under the section titled Exception Site List

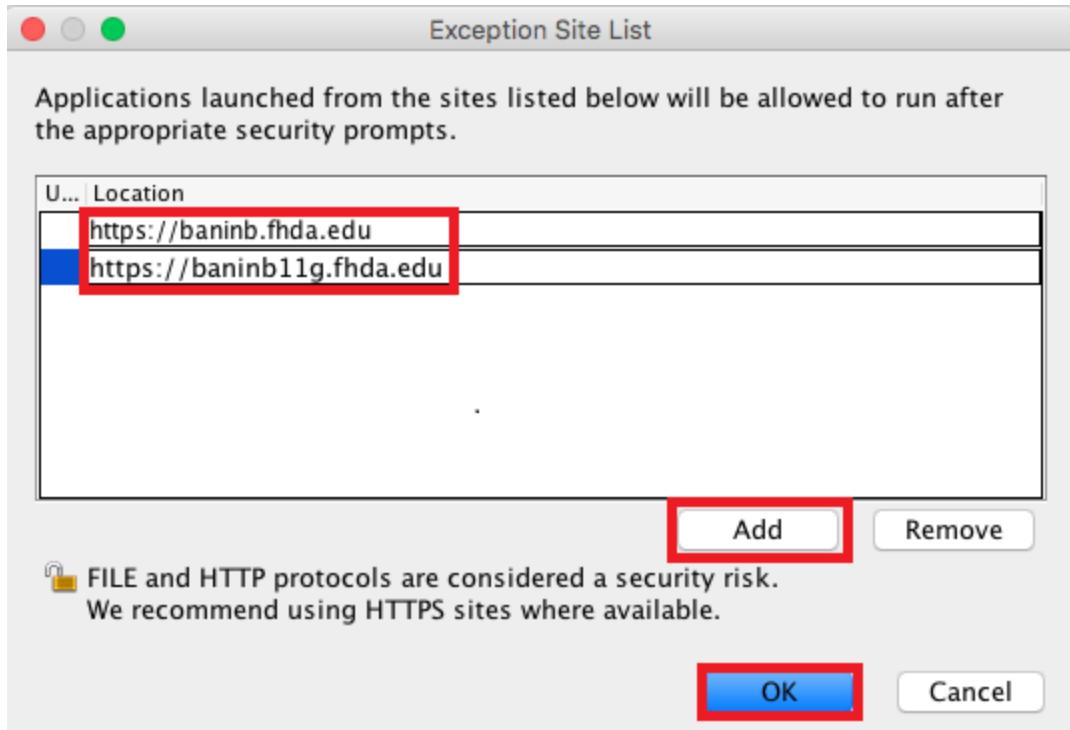

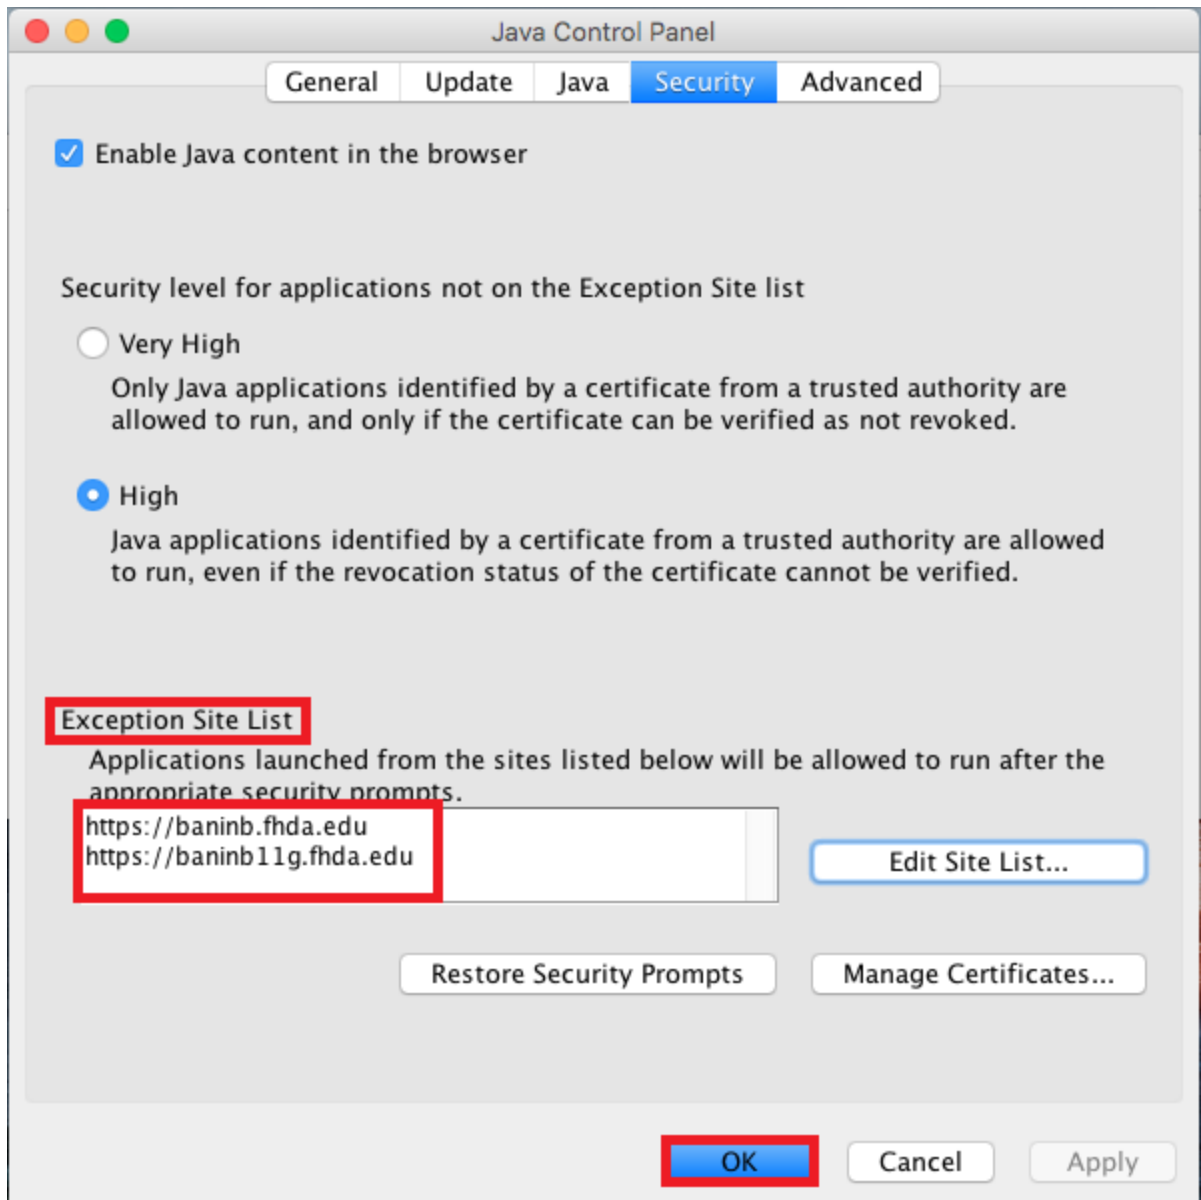

5. Add the URLs below one at a time, by clicking on the Add button, and once done, click on the OK button:

<https://baninb.fhda.edu>

<https://baninb11g.fhda.edu>

6. Verify that the sites appear under the Exception Site List, and click on OK:

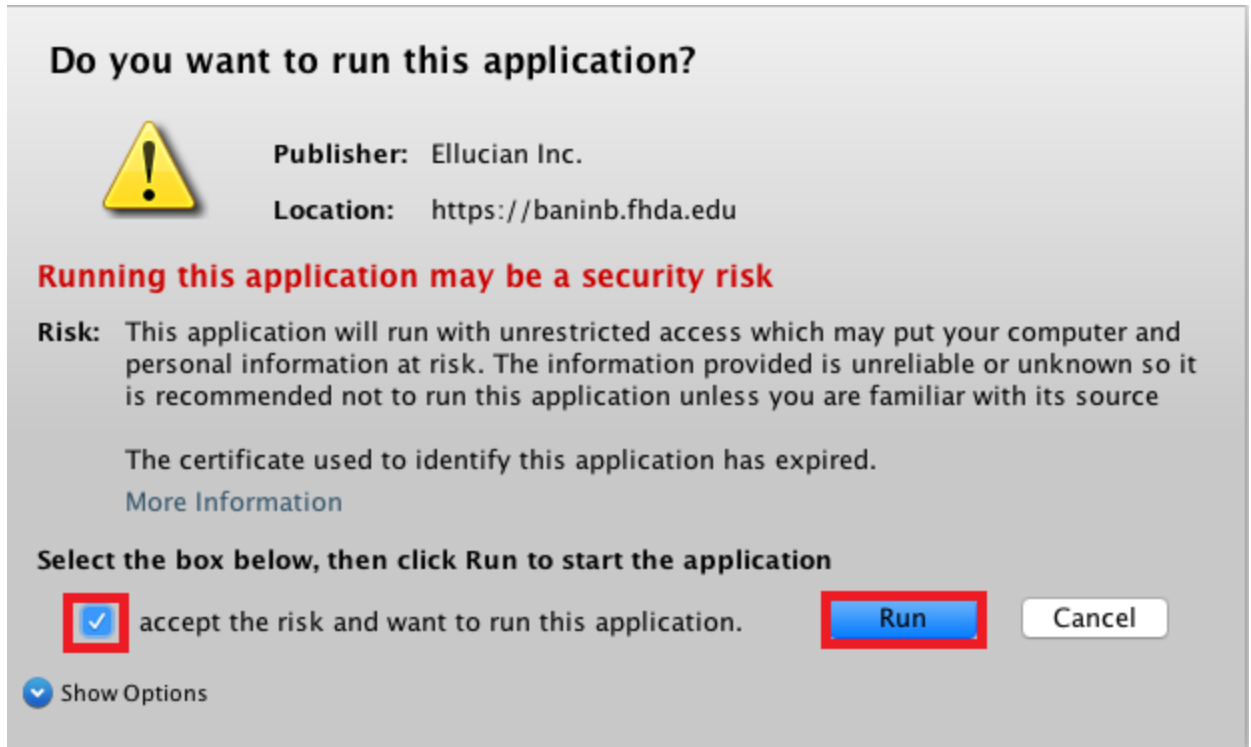

7. Close out the Java window, if it is still up

8. If you are currently logged in to MyPortal, then log out and close the browser (close the whole window, not just the tab where MyPortal is open)

9. Launch the browser, and log on to MyPortal, and re-try INB via the Banner tab, it should work now!

10. If a security warning appears, check the box as shown below and click on Run to proceed

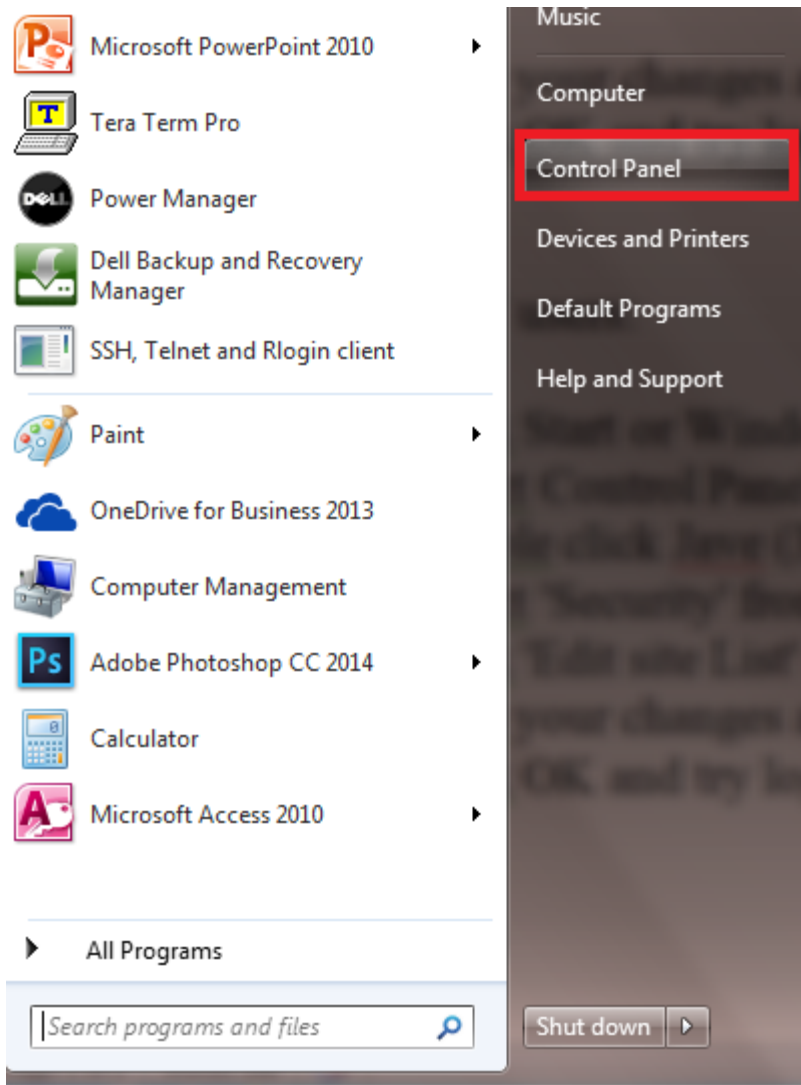

For PC(Windows) users:

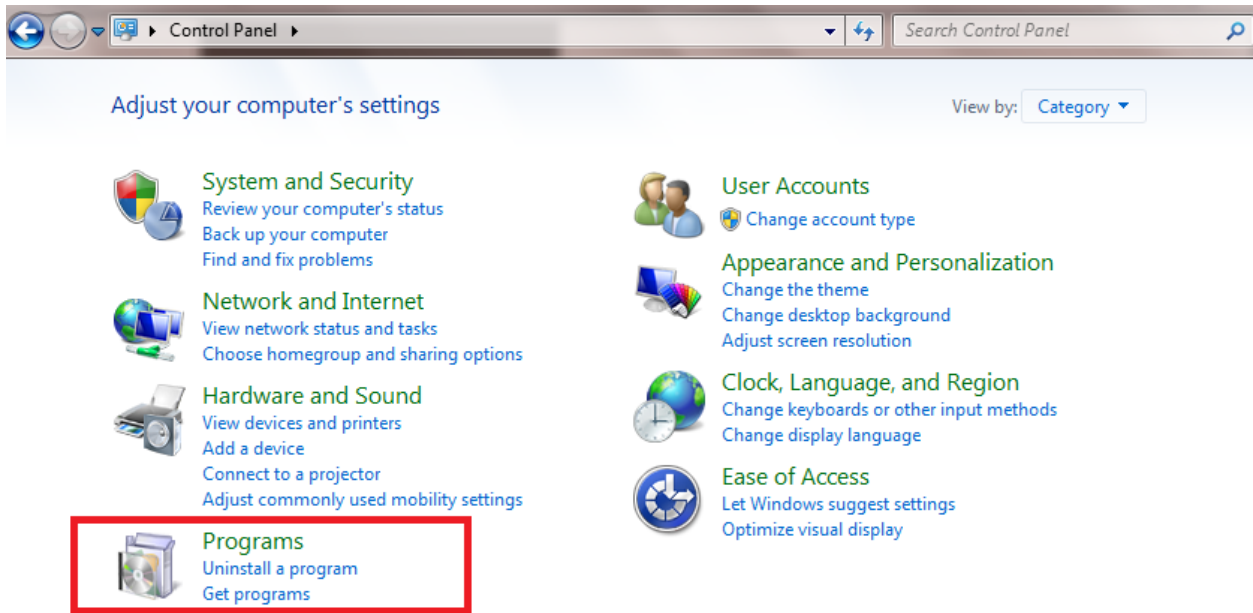

1. click Start or Windows

2. select Control Panel

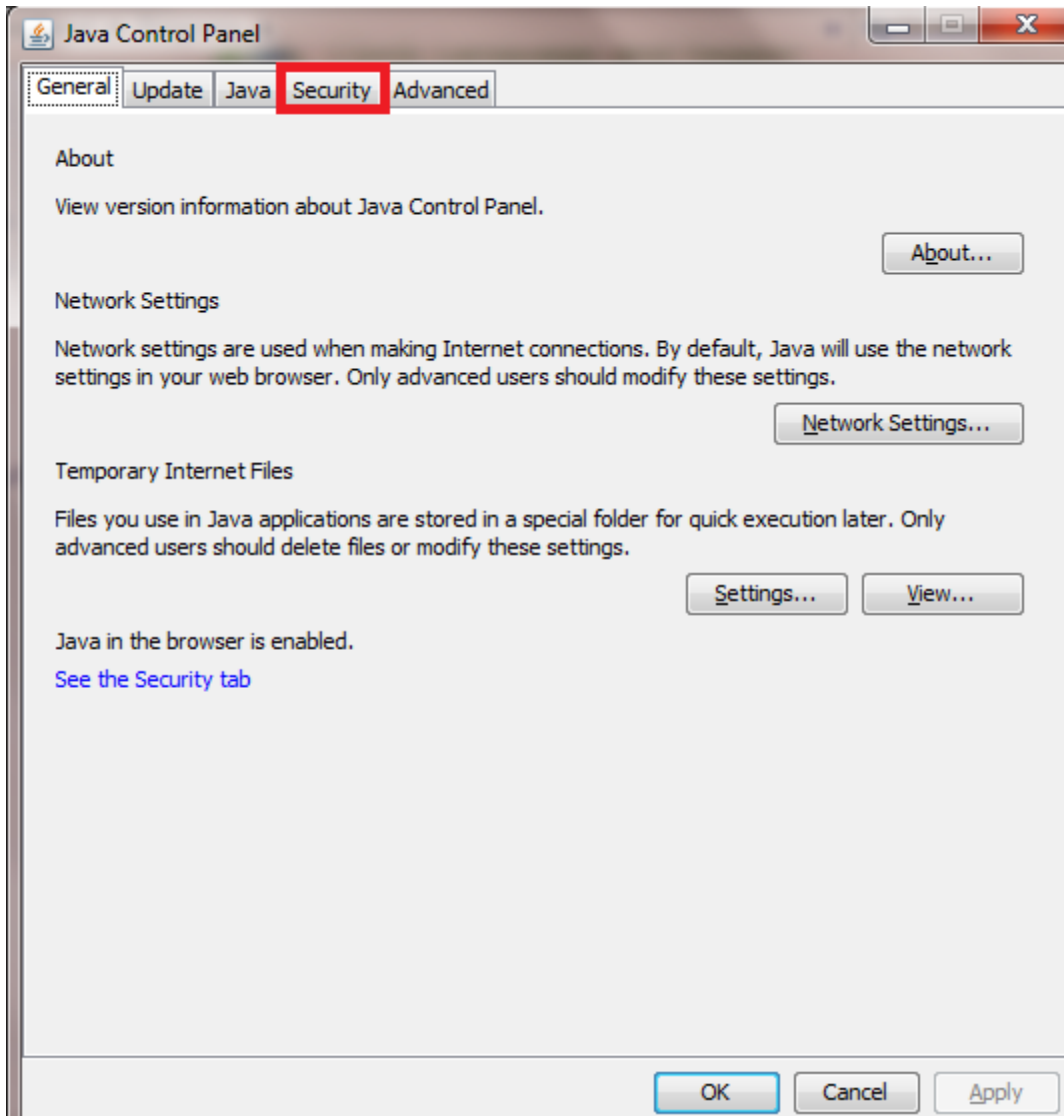

3. (if your PC's Control Panel setting is 'Category' view, click on Programs)

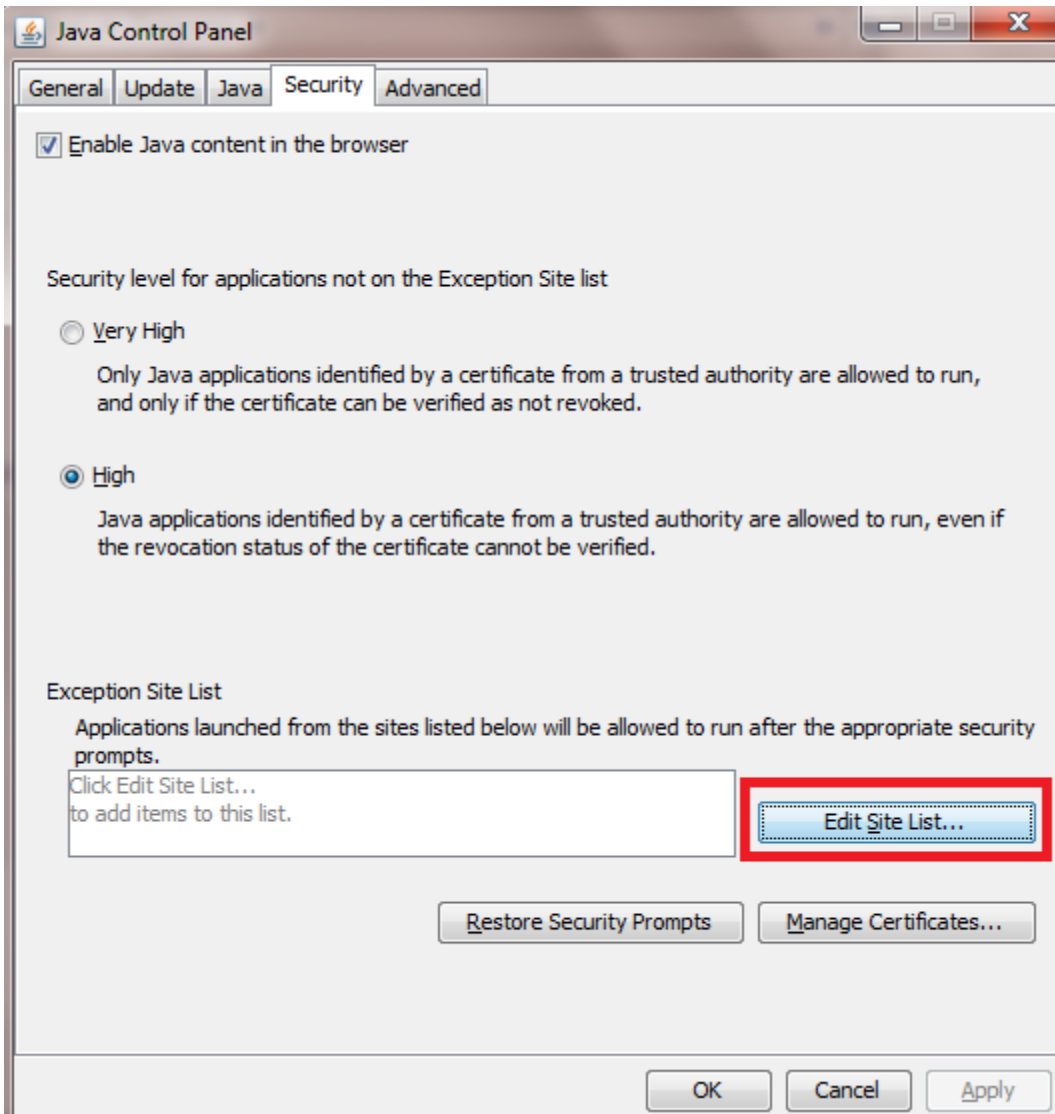

4. click Java (32 bits) icon

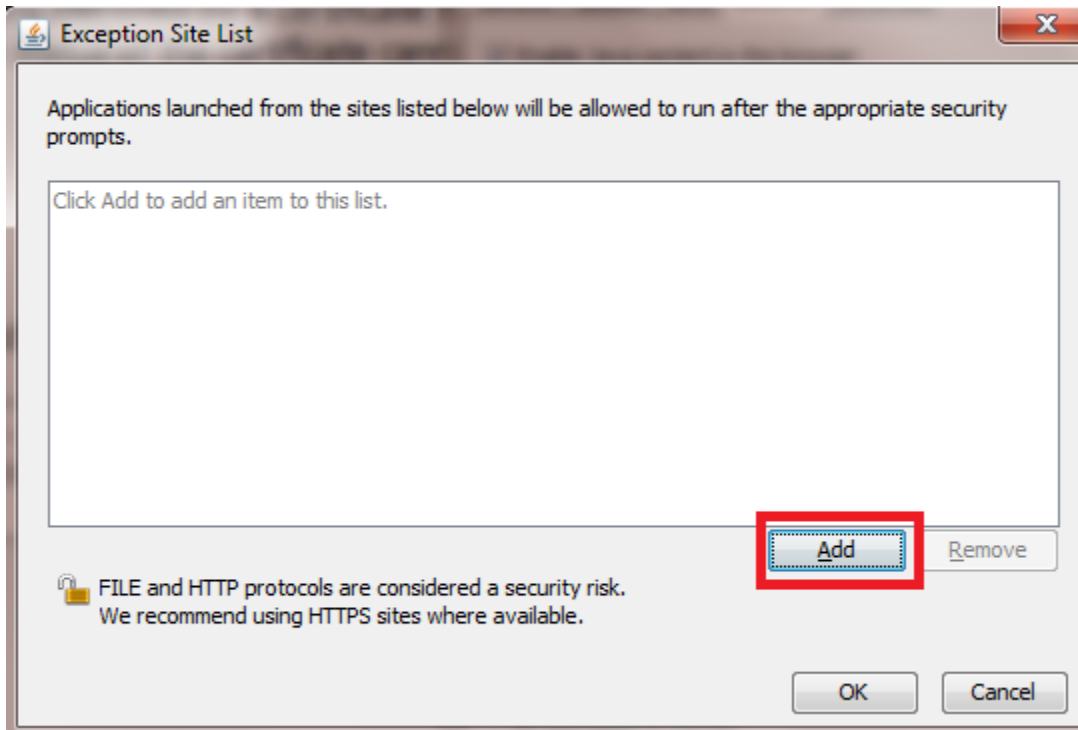

5. the Java Control Panel displays – select 'Security' from the Java Control Panel window

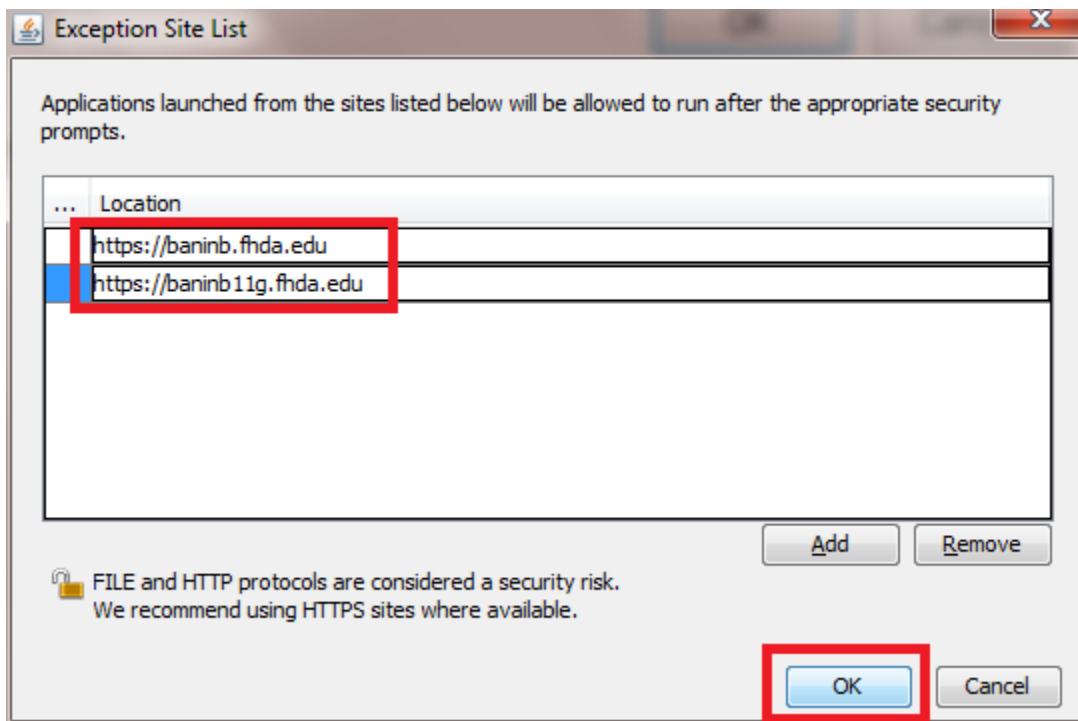

6. click 'Edit site List' and add '<https://baninb.fhda.edu>' and '<https://baninb11g.fhda.edu>' to the list

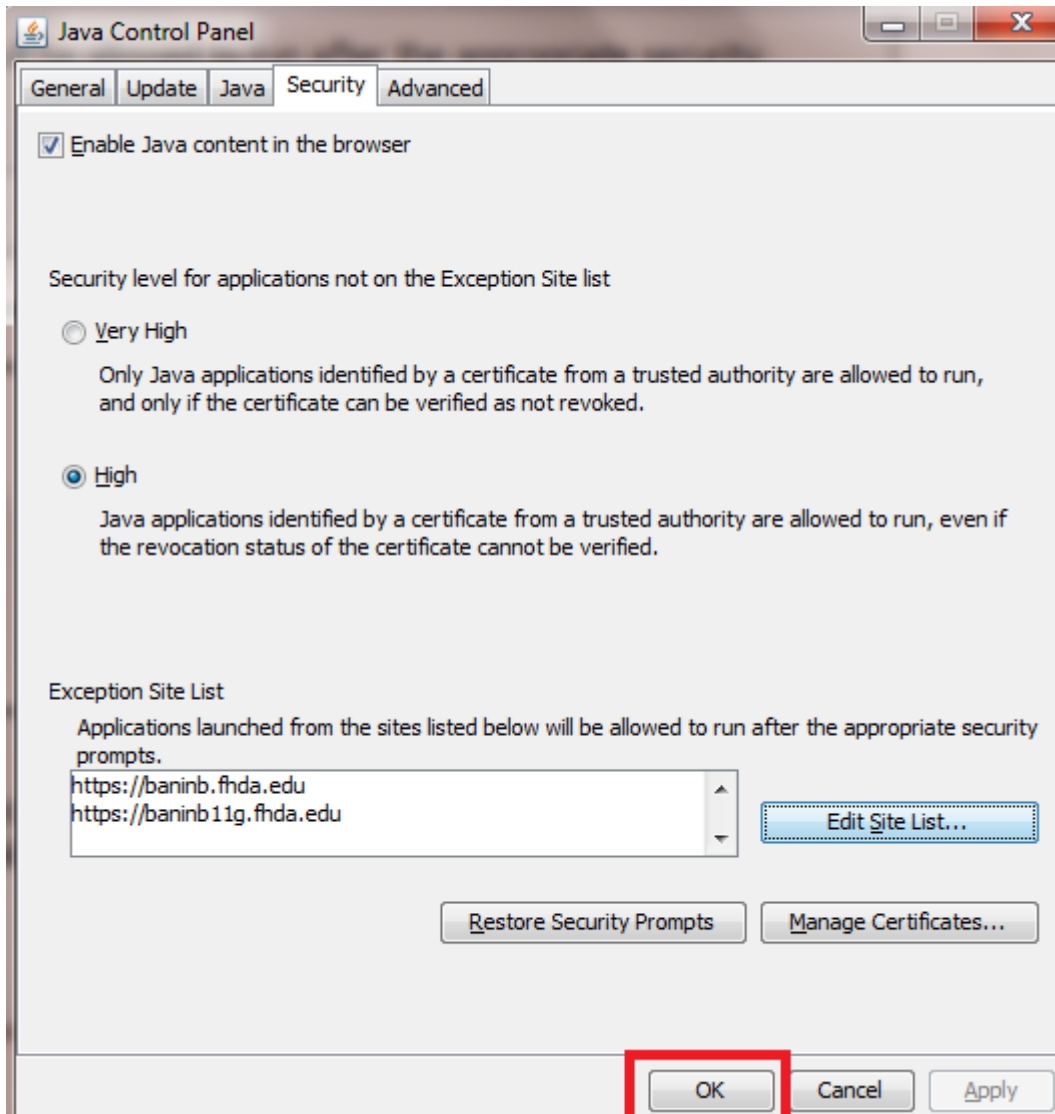

7. save your changes and verify you have added this 'https' site to the Exception Site List

8. click OK

9. If you are currently logged in to MyPortal, then log out and close the browser (close the whole window, not just the tab where MyPortal is open)
10. Launch the browser, and log on to MyPortal, and re-try INB via the Banner tab, it should work now!
11. If a security warning appears, check the box as shown below and click on Run to proceed
