

School's Current Login Process

Bill + Payment Login Options

TouchNet/ School's Setup Requirements

Students Login to Banner Self-Service using Student ID/PIN

Login directly to TBP login page using ID/PIN

No additional setup required

Automatic login from Banner self-service by passing ID/PIN to TBP

Customer will need to add a link and write code to capture and post the ID/PIN to the URL. TouchNet will provide sample code.

Students login to Luminus portal using portal (LDAP) username/password

Login directly to TBP login page using portal username/password

Customer needs to provide the completed LDAP data (in Technical Data Gathering worksheet). TouchNet will need to install LDAPConnect and test the connection and authentication against their LDAP

Automatic login from Lumius portal by using Luminus CPIP connector

Customer will send a pickup.html to be placed in the enduser directory of the Bill+Payment Suite. TouchNet will provide the URL to pickup.html for the school's setup. TouchNet can provide a reference if requested.

Students login to applications via CAS

Automatic login to TBP from CAS

School will need provide TouchNet with their CAS URL. TouchNet will need to configure the web.xml on the enduser side to redirect them to the CAS login. Additional information can be found in the Bill+Payment Technical User's Guide.
